1 **I. INTRODUCTION.**

2 Defendant has presented the opinions of its purported damage expert J. Bradley Sargent. Mr.
3 Sargent has not performed his own damage calculation but has instead only criticized Plaintiff's lost
4 revenue damage model. However, Mr. Sargent's opinions should be excluded by the Court. As set
5 forth herein, Badger outrageously provided its damages expert not only with Plaintiff's confidential
6 Mediation Brief, in violation of the agreement between the parties' and Guam law relating to
7 mediation confidentiality, it provided Sargent with GWA's *draft damage model* created by Mr.
8 Stanger. Doing so, in the face of counsel for GWA's express reservation in providing that
9 information for purposes of mediation. Badger then failed to disclose this information prior to Mr.
10 Sargent's deposition. The law is clear that Badger is not entitled to benefit from this betrayal of
11 counsel's trust that the materials would only be used for purposes of mediation.
12

13 Furthermore, Mr. Sargent is not qualified to offer the opinions he has given under the specific
14 facts of this case because, unlike Plaintiff's expert, he clearly has no knowledge of the water utility
15 industry and its billing and other business practices.
16

17 Finally, if the Court does not exclude Mr. Sargent as an expert witness based on the
18 foregoing, his testimony should be limited to those opinions that meet the requirements of Rule 702,
19 and *Daubert*, and that were properly disclosed pursuant to Rule 26(a)(2). Specific opinions that failed
20 to meet those requirements are discussed in Section V.
21

22 **II. LEGAL STANDARD.**

23 Expert evidence can be both powerful and quite misleading because of the difficulty in
24 evaluating it. *Daubert v. Merrell Dow Pharms. Inc.*, 509 U.S. 579, 595 (1993). Fed. R. Evid. 702
25 states that "[a] witness who is qualified as an expert by knowledge, skill, experience, training, or
26 education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical,
27

1 or other specialized knowledge will help the trier of fact to understand the evidence or to determine
2 a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product
3 of reliable principles and methods; and (d) the expert has reliably applied the principles and
4 methods to the facts of the case. Under Federal Rule of Evidence 702, trial courts must decide
5 whether an expert “ha[s] sufficient specialized knowledge to assist the jurors ‘in deciding the
6 particular issues in the case...,’” *Kumho Tire Co. v. Carmichael*, 526 U.S. 137, 156 (1999) (citation
7 omitted).

9 **III. MR. SARGENT SHOULD BE PROHIBITED FROM TESTIFYING AT TRIAL**
10 **BECAUSE HE CONSIDERED CONFIDENTIAL SETTLEMENT MATERIALS AS**
11 **A PART OF HIS ANALYSIS IN THIS CASE.**

12 Plaintiff’s economic damages expert, Cody Stanger, spent months distilling and analyzing
13 the usage and billing data of customer accounts with LP meters to determine the most sound and
14 reliable economic damage model to measure GWA’s lost revenue caused by the faulty LP meters.
15 During mediation in November of 2021, 10 months before GWA disclosed the reports of its
16 experts, Defendant Badger requested “some documentary support of the thorough analysis the
17 consultants [were] doing on lost revenues.” Dowd Decl. Ex. 1, Dowd Email November 8, 2021.
18 In an email to Defense counsel, Plaintiff’s counsel expressed GWA’s significant concerns that the
19 request to view the economic model for lost revenue was **an attempt to perform untimely**
20 **discovery on the issues** and that the documents being requested were not otherwise discoverable.
21 Id.¹ In hindsight, Plaintiff’s concern was well founded. Nonetheless, settlement negotiations
22 continued and on August 19, 2022, having previously cautioned Badger about use of damages-

23
24
25
26
27 ¹ Counsel for Badger have asserted that the body of this email was not provided to Mr. Sargent,
28 however it is still highly material in that it served to notify Badger that GWA was providing this
damages information solely for purposes of settlement negotiations, and expressly did not want
Badger to use such materials to perform improper discovery not permitted by the rules.

1 related materials for purposes of discovery or purposes other than mediation, Plaintiffs' counsel in
2 an email with the subject "GWA Badger Meter – Confidential Settlement Correspondence" sent a
3 summary economic damage model document along with the underlying consumption data, both
4 marked for SETTLEMENT PURPOSES ONLY, to Badger's counsel. Dowd Decl. Ex. 2, Dowd
5 Emails August 19, 2022. Counsel's email also expressly stated the materials were for settlement
6 purposes only. See *Id.*

7
8 Plaintiff was provided with a short list of four "documents relied on" as Exhibit B to
9 Sargent's report. Dowd Decl. Ex. 3, Sargent Report at 39. However, near the end of Sargent's
10 deposition, Plaintiff's counsel was provided another list of 90 documents that the Defendant's
11 accounting expert had considered but that had not been previously disclosed pursuant to the court's
12 Scheduling Order with the Defendants Rule 26(a)(2) disclosures or as required by Rule
13 26(a)(2)(B)(ii). Dowd Decl. Ex. 4. It was not until his deposition that it was discovered that Mr.
14 Sargent had been provided with Plaintiff's Confidential Mediation Statement with corresponding
15 exhibits, as well as four documents from Mr. Stanger's draft damage models, all marked with "**For**
16 **Settlement Purposes Only**" in both the filename and printed on the documents. See Dowd Decl.
17 Ex. 4. Defense counsel also provided Mr. Sargent with the Defendant's Mediation Statement,
18 marked "INADMISSIBLE UNDER FED. R. EVID. 408", demonstrating Badger's own
19 knowledge that the material exchanged between the parties were solely for purposes of mediation.
20
21

22 Badger had no good faith basis for providing these materials to a proposed expert witness.
23 And the bell cannot be unrung as Mr. Sargent was improperly provided highly sensitive
24 information regarding Plaintiff's expert's protected work-product, including subsequent choices
25 Mr. Stanger made in ultimately producing an improved damage model.² Badger has poisoned the
26
27

28 ² After indicating during the deposition that Mr. Sargent would not be produced a second time, Badger later offered a deposition limited to the undisclosed materials, including the improperly-

1 well to such an extent that allowing Mr. Sargent to testify in this case *at all* after this violation
2 would be prejudicial to Plaintiff and in contravention of well-established law and public policy.

3 **A. BADGER’S DISCLOSURE OF MEDIATION DOCUMENTS VIOLATES**
4 **GUAM LAW AND THE PARTIES’ AGREEMENT TO MEDIATE.**

5 Guam mediation law³ provides the following regarding mediation privilege and
6 confidentiality:

7 Evidence of anything said or of any admission made in the course of the mediation is not
8 admissible in evidence and disclosure of any such document shall not be compelled in any
9 arbitration or civil action in which, pursuant to law, testimony may be compelled to be
10 given.

7 Guam Code § 43A201(c)(2022).

11 Anything said, any admission made, or any writing that is inadmissible, protected from
12 disclosure, and confidential under this Chapter 43A before a mediation ends, shall remain
13 inadmissible, protected from disclosure, and confidential to the same extent after the
14 mediation ends.

7 Guam Code § 43A204.

15 In the event that any such evidence is offered in contravention of this Section, the
16 arbitration tribunal or the court shall make any order which it considers to be appropriate
17 to deal with the matter, including, without limitation, **orders restricting the introduction
of evidence**, or dismissing the case without prejudice”.

7 Guam Code § 43A201(b)

18 [Emph. suppl.]

19 In *Seeno Constr. Co.*, the district court excluded the plaintiff’s expert who was provided
20 with and reviewed the defendant’s mediation brief, despite the expert disclaiming any reliance on
21

22
23 provided mediation materials. However, as explained herein, a second deposition would only
24 compound the problem, as GWA cannot question Mr. Sargent in detail regarding the effect of the
25 draft damage model and other mediation materials without going into privileged and confidential
26 information that Mr. Sargent should never have seen. See *Irwin Seating Co. v. Int’l Bus. Machines
Corp.*, No. 1:04CV568, 2006 WL 3446584, at *3 (W.D. Mich. Nov. 29, 2006), aff’d, No. 1:04-
CV-568, 2007 WL 518866 (W.D. Mich. Feb. 15, 2007).

27 ³ Under Federal Rule of Evidence 501, privileges provided by state law apply in civil actions in
28 “which State law supplies the rule of decision.” Fed. R. Evid. 501. Therefore, the Guam mediation
privilege applies in diversity actions where state law is controlling. See *Albert D. Seeno Constr.
Co. v. Aspen Ins. UK Ltd.*, No. 17-CV-03765-SI, 2020 WL 6118497, at *2 (N.D. Cal. Oct. 16,
2020).

1 the mediation brief in coming to his conclusions, based on the California mediation privilege
2 statute. *Albert D. Seeno Constr. Co. v. Aspen Ins. UK Ltd.*, No. 17-CV-03765-SI, 2020 WL
3 6118497, at *5 (N.D. Cal. Oct. 16, 2020). Here, like in *Seeno*, the text and intent of Guam’s
4 mediation law is clear: mediation communications are unequivocally and permanently
5 inadmissible and privileged unless waived by the party making the disclosure or communication.
6 A party may waive the privilege by providing their expert with their own mediation brief but *not*
7 that of the other parties. *Id.* at *4.

9 The Guam mediation law further states that “An agreement in a writing to settle a
10 controversy by mediation shall be valid, irrevocable, and enforceable[.]” 7 Guam Code § 43A103.
11 Here, the Parties agreed prior to mediation **“that [] all statements, documents and disclosures**
12 **made or revealed at the mediation will be treated as settlement discussions under the rules**
13 **of evidence and will be inadmissible by any person unless offered by the person giving the**
14 **statement, revealing the document or making the disclosure.”** Dowd Decl. Ex 5, Mediation
15 Agreement.
16

17 In *Akamai Technologies*, a Northern District of California court found, in the context of a
18 Motion to Compel, that the attorneys’ agreement that a “Damages Memorandum” marked
19 “Confidential” would be revealed solely for the purpose of settlement negotiations was enforceable
20 and therefore the work-product privilege over that document was not waived. *Akamai Techs., Inc.*
21 *v. Digital Island, Inc.*, No. C-00-3508 CW(JCS), 2002 WL 1285126, at *7 (N.D. Cal. May 30,
22 2002). In the present case, the parties had an explicit agreement that all statements, documents,
23 and disclosures during mediation would be inadmissible, unless offered by the Party making the
24 disclosure. In fact, courts routinely enforce discovery agreements between parties that a particular
25 disclosure will not waive attorney-client and work product claims over related content. *Id.* In short,
26
27
28

1 mediation is a space where litigants may benefit by producing otherwise privileged information in
2 the spirit of compromise and dispute resolution, without waiving that privilege.

3 The mediation statements, as well as the documents sent by the request of the mediator
4 while settlement discussions continued after the Zoom mediation conference concluded on
5 November 8, 2021, were to be protected from disclosure to Defendant's experts by the laws of
6 Guam and the Mediation Contract entered into by both Parties. Furthermore, Defendant knew that
7 those settlement disclosures were governed by Rule 408 and barred from being used as evidence
8 at trial, as evidenced by the disclaimer on their own mediation brief. Dowd Decl. Ex. 6, Sargent
9 Depo at 38:17-24.
10

11
12 **B. BADGER'S DISCLOSURE OF CONFIDENTIAL SETTLEMENT**
13 **MATERIALS VIOLATES THE PUBLIC POLICY UNDERLYING THE**
14 **SETTLEMENT NEGOTIATIONS PRIVILEGE.**

15 Confidentiality encourages parties to attend mediation and communicate openly and
16 honestly in order to facilitate successful alternative dispute resolution, but "without adequate legal
17 protection, a party's candor in mediation might well be 'rewarded' by a discovery request or the
18 revelation of mediation information at trial." *Folb v. Motion Picture Indus. Pension & Health*
19 *Plans*, 16 F. Supp. 2d 1164, 1173 (C.D. Cal. 1998), *aff'd*, 216 F.3d 1082 (9th Cir. 2000) "A
20 principal purpose of the mediation privilege is to provide mediation parties protection against these
21 downside risks of a failed mediation." *Id.* The *Folb* Court expressed some doubt about the
22 necessity of establishing mediation privilege because litigants *generally* abide by the
23 confidentiality agreements and recognize "that courts, in appropriate instances, will accord
24 mediation evidence Rule 408 and public policy-based protection."⁴ *Id.*
25

26
27
28 ⁴ In his regard, courts have also noted that public policy supports the confidentiality of mediation materials because the underlying motivations of the parties during settlement are fundamentally different than they are in other litigation contexts. "Settlement negotiations are typically

1 Here, Plaintiff is requesting the Court to enforce Guam mediation law, Rule 408 and the
2 public policy reasons for confidential and inadmissible settlement communications and exclude
3 Mr. Sargent from testifying pursuant to Guam mediation law, Section 43A201(b) (providing “In
4 the event that any such evidence is offered in contravention of this Section, the arbitration tribunal
5 or the court shall make any order which it considers to be appropriate to deal with the matter,
6 including, without limitation, **orders restricting the introduction of evidence[.]**” [Emph. suppl.]

8 In this instance the proper remedy to protect Plaintiff from Badger’s violation of the well-
9 established public policy in keeping settlement negotiations and mediation confidential is to
10 exclude Sargent from testifying in this case.

11
12 **C. THE PREJUDICE TO PLAINTIFF CANNOT BE PROPERLY REMEDIED
13 OTHER THAN THROUGH EXCLUSION OF SARGENT’S TESTIMONY.**

14 In *Irwin Seating Co.*, a district court in Michigan held that exclusion of the plaintiff’s expert
15 was the appropriate remedy where he’d been exposed to the mediation materials, clearly
16 designated as confidential, in violation of the court’s mediation order and the settlement privilege
17 generally. *Irwin Seating Co. v. Int’l Bus. Machines Corp.*, No. 1:04CV568, 2006 WL 3446584, at
18 *3 (W.D. Mich. Nov. 29, 2006), *aff’d*, No. 1:04-CV-568, 2007 WL 518866 (W.D. Mich. Feb. 15,
19 2007). The court held:

20
21 **[T]here is no adequate way to assess the impact the mediation briefs had on the**
22 **experts, and how the experts may have shaped their evaluations consciously or**
23 **unconsciously in response to the claims made and positions taken by defendants in**
24 **their mediation briefs.** Even in denying any recall of what defendants’ positions were in
25 their reports, both experts concede these briefs were among the first documents they read,
26 ‘in order to gain some sense of what the case was about.’ The bell has been rung. There are
27 simply some things that cannot be forgotten once they are learned. *Id.* [Emph. suppl.]

28
punctuated with numerous instances of puffing and posturing since they are ‘motivated by a desire
for peace rather than from a concession of the merits of the claim.’” *Goodyear Tire & Rubber Co.*
v. Chiles Power Supply, Inc., 332 F.3d 976, 981 (6th Cir. 2003) (citing *United States v. Contra*
Costa County Water Dist., 678 F.2d 90, 92 (9th Cir.1982)). The parties to mediation “may assume
disputed facts to be true for the unique purpose of settlement negotiations. The discovery of these
sort of ‘facts’ would be highly misleading if allowed to be used for purposes other than settlement.”
Id.

1 The court further found that bad-faith or not, it was the violating party who had to bear the
2 brunt of the resolution. *Id.* The court held that “[T]he factual basis for the expert's opinion is subject
3 to inquiry and cross-examination. Fed. R. Evid. 703. Because the information in issue is
4 confidential, **Defendants will be unable to fully challenge the experts' assertions that their**
5 **opinions were not influenced by confidential settlement knowledge.”** *Id.* [Emph. suppl.] In this
6 case, Plaintiff anticipates Badger will similarly and self-servingly claim that Sargent did not rely
7 on these materials. GWA faces the same problem, in that it cannot “fully challenge” Badger’s
8 expert’s reliance on the draft damage model without going into privileged and protected information
9 that Badger should never have disclosed. Among other things, GWA cannot impeach or cross-
10 examine Sargent with this information without opening the door to explaining Cody Stanger’s draft
11 model in detail, in violation of F.R.E. 408’s protection of confidential settlement discussions as
12 well as the expert work-product privilege.⁵

13 Defendant’s conduct in providing these settlement materials to its expert was not only in
14 derogation of Guam law, the Mediation Agreement, and Plaintiff’s counsel’s email warning of any
15 ulterior motives by Defendant in seeking this information, but also the public policies and common
16 understanding of the purpose for which mediation and settlement materials are to be used. As
17 stated in *Irwin*, it is the violating party who must bear the brunt of the resolution given their
18 violations of the rules and the agreement with Plaintiff.

19
20
21
22
23
24
25 ⁵ Nevertheless it is clear that Mr. Sargent’s review of these materials profoundly impacted his
26 opinions and criticisms of Plaintiff’s damages expert. For example, Mr. Sargent opined in his
27 deposition on two occasions that Mr. Stanger “abandoned” the data that was in Appendix B. Dowd
28 Decl. Ex. 6, Sargent Depo. p. 60:21-22; 157: 2-8. Without getting into the privileged contents of
 Plaintiff’s draft damage model, this statement still clearly leads to the inference that Mr. Sargent
 considered Mr. Stanger’s prior damage model (and its differences from the ultimate model) in his
 opinions, as he would have no other way of knowing what Mr. Stanger “abandoned” in regard to
 the use of various data sources.

1 **IV. MR. SARGENT IS NOT QUALIFIED TO OPINE ON PLAINTIFF'S ECONOMIC**
2 **DAMAGE MODEL DUE TO HIS LACK OF KNOWLEDGE OF THE WATER**
3 **UTILITY INDUSTRY AND ITS PRACTICES.**

4 Under Federal Rule of Evidence 702, trial courts must decide whether an expert “ha[s]
5 sufficient specialized knowledge to assist the jurors ‘in deciding the particular issues in the
6 case...,’” *Kumho Tire Co. v. Carmichael*, 526 U.S. 137, 156 (1999) (cit. omit). Courts have noted
7 that evaluation of an expert’s qualifications should be assessed “in light of the specific facts of the
8 case.” *Webster ex rel. Webster v. National Heritage Realty, Inc.*, 2009 WL 485692, at *2
9 (S.D.Miss. 2009).

10 Here, Mr. Sargent lacks the requisite knowledge, skill, experience, training, and/or
11 education to be qualified as an expert to rebut Mr. Stanger’s economic damages model. Sargent is
12 a Certified Public Accountant, with no specialized experience or knowledge in public utilities or
13 their billing systems, who provides forensic accounting services to litigants. Dowd Decl. Ex. 6,
14 Sargent Depo. at 17:1-9. Mr. Sargent is admittedly not an economist and did not provide any
15 alternative economic model to the one presented by Mr. Stanger. Id. at 39:20–23; 62: 6-13. And
16 despite claiming to have worked on issues related to business valuation, economic loss, financial
17 investigations and forensic accounting “across a wide array of industries,” Sargent has no utility-
18 specific knowledge, nor did he even attempt to educate himself about utility-specific billing or
19 accounting practices. Dowd Decl. Ex. 3, Sargent Report at 5. This has caused him to repeatedly
20 call out “anomalies” in GWA’s data, that are in fact commonplace in the water and wastewater
21 industry, as explained more fully below. Allowing him to testify will not only confuse the jury on
22 an already complex issue of economic damages, but it will be an inefficient use of the jury’s time
23 due to Plaintiff’s counsel and expert having to repeatedly respond to supposed “rebuttal” opinions
24
25
26
27
28

1 that are purely based on Mr. Sargent's lack of understanding of utilities and the water and
2 wastewater industry.⁶

3 **A. SARGENT HAS NO EXPERIENCE IN THE WATER INDUSTRY OR ANY**
4 **OTHER FIELD THAT WILL ASSIST JURORS IN UNDERSTANDING**
5 **GWA'S DAMAGE MODEL OR ITS UNDERLYING DATA**

6 While Sargent has many certifications in forensic accounting and the like, none of his
7 certifications relate to the unique financial features of public utilities or municipalities. Dowd Decl.
8 Ex. 3, Sargent Report at 5. He has never advised a utility on any issue. Dowd Decl. Ex. 6, Sargent
9 Depo. at 119; 5-7. In over a decade of providing professional presentations, speeches and seminars
10 related to forensic accounting, none have involved issues related to utilities. Dowd Decl. Ex. 6,
11 Sargent Depo. at 128:7-15; Ex. 3, Report at 39. Likewise, he has never published on any issues
12 related to utility revenues that he can recall. Dowd Decl. Ex. 6, Sargent Depo. at 127:19-22.

14 The lack of experience in this very specialized area of water utility revenues is perhaps best
15 demonstrated by Mr. Sargent's attempt to create experience with water utility consumption and
16 billing data. During his deposition he identified one case where he acted as a consultant, not
17 testifying or preparing a written report, that "used" water consumption and billing data. Dowd
18 Decl. Ex 6, Sargent Depo. at 54:11-13. However, based on his description of the dispute, wherein
19 the City of Harvey was not paying their water bill to the City of Chicago but was charging other
20 municipalities downstream for the water it got from Chicago, that case provides no relevant
21 experience because it was a dispute between municipalities about water production and
22

23
24
25 ⁶ It appears that Badger hired an expert who is not qualified in the relevant area or industry but
26 that their attorneys know to be a "hatchet man." Mr. Sargent estimated that he had worked with
27 Foley & Lardner attorneys ten to twelve times on different cases and was co-presenting at a
28 conference with a Foley attorney in the days following his deposition. Dowd Decl. Ex. 6 at 26: 7-
12; 129:17 - 130:14.

1 distribution between entities, not related to consumption by individual water consumers based on
2 the accuracy of water meters and meter by meter consumption data. Dowd Decl. Ex. 6, Sargent
3 Depo. at 53:13-54:7. In fact the only specific consumption data he could recall looking at from
4 that case was from a hospital that was not showing significant readings given its size. Id. at 54:19-
5 55:6. Sargent did not recall whether that data set had negative monthly consumption readings. Id.
6 at 84:14-21. Sargent also claims to have investigated one other case dealing with utility billing but
7 could not recall the name of the utility and did not prepare a report or testify. Id. at 117:14 -118:8.

9 **B. SARGENT MAKES REPEATED MISTAKES IN HIS REBUTTAL OF GWA'S**
10 **DAMAGE MODEL BECAUSE OF HIS LACK OF EXPERIENCE AND**
11 **KNOWLEDGE OF THE WATER UTILITY INDUSTRY.**

12 **1. SARGENT DEMONSTRABLY DOES NOT UNDERSTAND THE**
13 **DIFFERENT COMPONENTS OF REVENUE OF A WATER UTILITY.**

14 Mr. Sargent attempted to invalidate the Appendix B database by stratifying the
15 consumption data for a single year single year, 2016, to come up with the revenue from LP meter
16 accounts for that year and comparing that to the reported total water revenue in GWA's 2016
17 audited financial statement to try to "reconcile" the data with the Linear Degradation Model. Dowd
18 Decl. Ex. 3, Sargent Report at 24. He then concluded that the "large variance" between his
19 calculation and the revenue reported in the financial statement indicates "some anomaly in the
20 Appendix B data." Id. What he failed to understand is that the *consumption measured from*
21 *residential meters is just one of six different components* that make up GWA's total revenue as
22 reflected in the audited financial statement. He was comparing apples to oranges. See Dowd Decl.
23 Ex. 7, Stanger Rebuttal Report at 5-6. Further demonstrating his inexperience, Mr. Sargent testified
24 that he has no opinion on whether water revenue components consist of a monthly base charge and
25 likewise no opinion on whether the components of water revenue listed in Table 2 of Mr. Stanger's
26 rebuttal report were correct. Dowd Decl. Ex. 6, Sargent Depo. at 74:22-76:24. Mr. Sargent erred
27
28

1 in his analysis of the data and the model due to his lack of understanding of water industry revenue
2 structure and now admits he cannot provide any opinion on those revenue components.

3 **2. SARGENT CLAIMED “ANOMALIES” IN THE DATA THAT ARE**
4 **ORDINARY PRACTICES OF WATER UTILITY BILLING.**

5 Sargent’s lack of familiarity with the context of the current lawsuit causes him to repeatedly
6 make elementary errors in his criticisms of Plaintiff’s damage expert. Namely, Sargent repeatedly
7 blunders in his report by calling out supposed data “anomalies” that are not anomalies at all but
8 commonplace in utility billing practices. For example:
9

- 10 1. Mr. Sargent’s *only* criticism of the LP meter test data, Appendix C to the Stanger report,
11 is that it showed meters that tested above 100% accuracy. Dowd Decl. Ex. 3, Sargent
12 Report, p. 15. Sargent further criticized Mr. Stanger for not providing an “explanation”
13 for a meter having test results above 100%. Id. at 11. He then admitted in deposition
14 after being confronted with the AWWA testing standards that the water meter industry
15 itself recognizes that meters test above 100% and that he was not aware of that fact
16 until his deposition. Dowd Decl. Ex. 6, Sargent Depo. at 95:10- 96:6.
- 17 2. Sargent points to negative consumption numbers in the billing data as evidence of
18 problems with the database as a whole, when in reality the negative consumption
19 readings represent just 0.04% of the non-zero readings in the database and are
20 explained by corrections to overbilling that can occur in prior billing periods, and is
21 commonplace in the industry. Dowd Decl. Ex. 7, Cody Stanger Rebuttal Report at 2.
- 22 3. Sargent points to 7 meters, or 0.02% of the dataset of almost 32,000 meters, that had
23 an “anomalous” reading of 20 times the average consumption over those meters’
24 installations, and completely ignores the possibility that a water consumer may have
25 periods of abnormally high-water consumption due to things like filling a pool, or
26 having a significant leak due to a pipe burst on the customer side of the meter. The
27 combination of the small portion of the data he is calling into question together with
28 his ignorance of industry explanations shows that he is grasping at straws as an
advocate trying to undermine the model. Id. at 2.
4. Sargent also criticizes the data because of meters showing consecutive months of zero
readings and overlooks the most obvious explanation that is the basis for this lawsuit,
that LP meters failed catastrophically and were not measuring water consumption. He
also chooses to ignore other explanations explained by Mr. Stanger such as seasonal
occupancy or meters being removed for testing that an industry expert would
understand. Id. at 2-3.

1 **3. SARGENT ERRONEOUSLY RELIES ON ANNUAL FINANCIAL**
2 **STATEMENTS THAT DO NOT CONTAIN DATA RELEVANT TO A LOST**
3 **REVENUE ANALYSIS FROM THE FAILING LP METERS.**

4 In his rebuttal report Sargent repeatedly refers to, and heavily relies on, GWA's audited
5 annual financial statements, which to an accountant may seem like they should contain relevant
6 data to GWA's financial losses. See, e.g., Dowd Decl. Ex. 3, Sargent Report at 3, Opinion No. 3
7 and at 20. Nonetheless, Sargent admitted in deposition that the annual financial statements do *not*
8 contain any data that would allow GWA to understand the revenues lost due to the failure of the
9 LP meters to accurately record customers' water consumption. Dowd Decl. Ex. 6, Sargent Depo.
10 at 65:2 – 66:8. The financial statements, in fact, do not contain any individual consumption or
11 billing data at all, let alone the data relating to LP metered accounts. Id. Perhaps Mr. Sargent's
12 confusion on the relevance of the financial statement should not be surprising given that Sargent,
13 as a CPA, has never prepared an audited financial statement for a utility, or done any form of
14 accounting work for a utility. Id. at 16:12-25. Sargent also recognizes that the revenue components
15 as described in Section IV.B.1, that he failed to address in his attempts to "reconcile" the data with
16 the Linear Degradation Model, are *not* contained in the annual financial statements. Id. at 76:8-13.

17 It is clear from his report and deposition that Mr. Sargent does not understand basic
18 concepts related to water meter consumption or utility billing practices, that he has no experience
19 with lost revenues damages of a utility, that he has never calculated economic damages from
20 consumption/billing data, and that he fundamentally does not understand the concept of an
21 economic model such as the Linear Degradation Model as applied in this case. Mr. Sargent did not
22 employ any specialized knowledge, technique or method in analyzing Stanger's model and his
23 opinions amount to an attempt to bolster any cross examination of Cody Stanger, as his lack of
24 25
26
27
28

1 expertise in the water utility industry demonstrates that he can in no way assist the jury in
2 evaluating GWA's damage model.

3 **V. SHOULD MR. SARGENT NEVERTHELESS BE ALLOWED TO TESTIFY IN**
4 **THIS CASE, THE COURT SHOULD STILL LIMIT HIS TESTIMONY AND**
5 **EXCLUDE A NUMBER OF HIS IMPROPER OPINIONS.**

6 **A. MR. SARGENT SHOULD NOT BE ALLOWED TO TESTIFY OR COMMENT**
7 **REGARDING MR. STANGER'S SUPPOSED "BIAS."**

8 Mr. Sargent attended the deposition of Mr. Stanger which occurred the day before his
9 deposition. Mr. Sargent testified that he developed an opinion during Mr. Stanger's deposition that
10 there could be an "issue of bias." Dowd Decl. Ex. 6, Sargent Depo. at 45:17 – 46:2. He claimed
11 that Mr. Stanger made an unsubstantiated statement of fact in his report that indicated bias. The
12 example he gave was from an introductory paragraph to Mr. Stanger's report where he stated that
13 GWA customers were complaining about their water bills. Sargent Depo p. 46:21 – 47:7. Notably
14 this issue has no relevance to the economic damage model and was solely background information
15 included in his report. Sargent also stated that Mr. Stanger's prior relationship with GWA working
16 on a case with the Public Utilities Commission to increase rates "could be" indicative of bias.
17 Dowd Decl. Ex. 6, Sargent Depo. at 45:23–50:12.

18
19 First, it is plainly improper for Sargent to comment on Mr. Stanger's credibility as experts
20 are not permitted to do so and that is the sole province of the jurors. *See Banga v. Kanios*, 2020
21 WL 9037179, at *3 (N.D.Cal., 2020), (holding that "an expert witness is not permitted to testify
22 specifically to a witness' credibility" and that expert was barred from commenting on witness'
23 testimony based on alleged "inaccuracies, omissions, and misrepresentations,") citing *Reed v.*
24 *Lieurance*, 863 F.3d 1196, 1209 (9th Cir. 2017). Any such opinion is improper as a matter of law,
25 and would also unfairly bolster any cross-examination or closing argument of the Defendant.
26 Furthermore, Sargent has no qualifications, experience or special knowledge related to evaluating
27
28

1 an expert witness's "bias." Lastly, this opinion lacks a reliable foundation, given that the only
2 example he provided was based on Mr. Stanger testifying that he believed he learned about
3 customers complaining about their water bill during a conference call with GWA. Dowd Decl. Ex.
4 6, Sargent Depo. at 46: 21 – 47: 7.

5
6 **B. SARGENT SHOULD NOT BE ALLOWED TO OPINE THAT GWA AS A**
7 **NON-PROFIT ENTITY COULD STILL INCUR LOST "PROFITS"**
8 **INSTEAD OF LOST "REVENUES."**

9 During his deposition, Mr. Sargent took issue with the section of Stanger's report and
10 deposition testimony describing why GWA's economic losses due to the faulty LP meters
11 constituted revenue loss, contending that GWA as an entity could still suffer lost profits. Dowd
12 Decl. Ex. 6, Sargent Depo. at 122:8-126:4. It was not until his deposition that Sargent opined for
13 the first time that GWA could suffer lost profits under "basic fund accounting" principles despite
14 being aware of Mr. Stanger's position on lost revenues that was clearly included in his original
15 report. Sargent was aware, based on Mr. Stanger's report, that Mr. Stanger was of the opinion that
16 this was a lost revenue case, not lost profits, and yet Mr. Sargent did not rebut this opinion in his
17 report, even though he admittedly could have done so. Id. at 165:8-14; 166:25 -167:2.

18
19 An expert report is required to include "a complete statement of all opinions the witness
20 will express and the basis and reasons for them." *See Ruiz v. Walmart Inc.*, 2021 WL 4796960, at
21 *2 (C.D.Cal. 2021). Mr. Sargent's "lost profits" opinion was not disclosed in his original report,
22 and Badger has failed to supplement that report in a timely or reasonable manner with this new
23 opinion, the bas and reasons therefore and the materials considered in relation to it, all as required
24 by the expert report provisions of Rule 26(a). Plaintiff's counsel did not have notice of this
25
26
27
28

1 significant new opinion prior to his deposition, for which Mr. Sargent had no excuse or justification
2 in failing to disclose in a timely manner.⁷

3 Plaintiff's counsel was thereby deprived of the ability to fully and properly prepare for
4 examination on this opinion during his deposition, and Mr. Stanger was deprived of the ability to
5 address this issue in his rebuttal report, which had already been provided to Badger. Furthermore,
6 and as presented in detail above, Mr. Sargent simply does not have the qualifications to opine on
7 the financial structure of water utilities. For all of these reasons this opinion should be excluded.
8

9 **C. SARGENT SHOULD BE PRECLUDED FROM PROVIDING ANY**
10 **ALTERNATE DAMAGE CALCULATIONS OR SPECULATION**
11 **REGARDING HOW HE WOULD HAVE APPROACHED MR. STANGER'S**
12 **CALCULATION.**

13 As stated above, Mr. Sargent explicitly disclaimed *any* opinion on a more accurate or
14 alternate calculation of GWA's economic damages, nor did he include any alternative calculations
15 in his Report. See Dowd Decl. Ex. 3. In fact, in his only testimony regarding what his approach
16 would have been to calculate lost revenues, he stated he would have ignored the consumption and
17 billing data, even if it was consistent with industry expectations, and instead use the audited
18 financial statements to form such an expert opinion. Dowd Decl. Ex. 6, Sargent Depo. at 87:1-21.
19 Yet in the same deposition he admitted the financial statements do not discuss LP meter
20

21 ⁷ The Ninth Circuit gives "particularly wide latitude to the district court's discretion to issue
22 sanctions under Rule 37(c)(1)," which "gives teeth to the Rule 26(a) disclosure requirements." *Yeti*
23 *by Molly, Ltd. v. Deckers Outdoor Corp.* ("Yeti"), 259 F.3d 1101, 1106 (9th Cir. 2001). Rule
24 37(c)(1) is a "recognized broadening of the sanctioning power," *id.*, which the Federal Rules
25 Advisory Committee described as a "self-executing," "automatic" sanction to "provide[] a strong
26 inducement for disclosure of material..." Adv. Comm. Notes to 1993 Amendments. As stated
27 above, the rule provides two exceptions to the otherwise "automatic" sanction of witness
28 preclusion: where the failure to disclose the required information is (1) "substantially justified," or
(2) "harmless." Fed. R. Civ. P. 37(c)(1); see *Yeti*, 259 F.3d at 1106. "The party facing sanctions
bears the burden of proving that its failure to disclose the required information was substantially
justified or is harmless." *R & R Sails, Inc. v. Ins. Co. of Pa.*, 673 F.3d 1240, 1246 (9th Cir. 2012).

1 consumption or billings related to LP customers. Id. at 65:15-23. And he further admitted that the
2 audited financial statements do not make any attempt to specifically identify lost revenue from LP
3 meters. Id. at 66:25 – 66:8. Under all of these circumstances, Sargent should be prohibited from
4 testifying as to what “he would have done” in an economic damage calculation in this case.

5 **WHEREFORE**, Plaintiff Guam Waterworks Authority respectfully prays that this
6 Honorable Court make and enter its Order prohibiting J. Bradley Sargent from testifying in the trial
7 of this cause, or in the alternative (1) exclude any testimony regarding Mr. Stanger’s purported
8 “bias” or otherwise improperly commenting on the credibility of any witness; (2) exclude any
9 testimony that GWA could incur “lost profits” under accounting principles or otherwise; (3)
10 exclude any testimony regarding an alternate calculation or alternate methods of calculating
11 GWA’s damages; (4) exclude any other opinions or expert testimony not properly disclosed in Mr.
12 Sargent’s report and deposition; and (5) for any other relief the Court deems just and proper, the
13 premises considered.

14 **DATED** this 1st day of March, 2023.

15
16
17
18 Respectfully submitted.
